KEY INSIGHTS & RECOMMENDATIONS

STRENGTHS

- Pediatric ART coverage improved by 3%
- Data quality score increased to 8.7/10
- All states submitted timely reports

AREAS FOR IMPROVEMENT

- State B viral load suppression below target (85% vs 90% goal).
- Pediatric retention needs attention (89% vs 95% target).

RECOMMENDATIONS:

1. Targeted interventions in State B for viral load improvement
2. Enhanced tracking for pediatric clients
3. Continue weekly data quality checks
